

Returning Student Registration FAQ's

If I registered my child for Kindergarten in March for the 2019-2020 school year, do I need to complete the registration process? No. Registration is only for Pre-K through 11th graders who are currently enrolled.

How do I get my student's ID#? You should have received an email regarding student registration that included your student ID#. Your Student ID number is also printed on your student's report card and visible in your parent portal account. If you did not receive the email or it is lost, please contact your student's current school.

My student's password isn't working. The password is your student's birthday in MM/DD/YYYY format and must include the slashes. Be sure you are using YYYY format. (That's a common mistake!)

Why do you need my vehicle tag information? Vehicles not properly registered in the state are not contributing tax money to the county which helps to pay for a number of services, including local schools. Parents are asked to provide this information as part of the registration/enrollment process and will be given options to justify tags that are registered out of state.

I submitted my student's re-enrollment in Registration Gateway. Am I done? No! You must go to step 4 – pay instructional fee and other school related fees via the [Pay Fees system](#). Registration is not complete until you have paid fees.

Registration doesn't open until May 3, but I have instructional fees in my cart already. Do I need to pay them? Yes. Instructional fees may appear in your cart one or two days before registration begins.

I'm moving out of the district and my student doesn't need to re-enroll. Please notify your school's PowerSchool clerk as soon as possible to facilitate record transfer to the new school and to assist us in planning and placement for next year.

I'm moving within the district. Please notify your school's PowerSchool clerk as soon as possible to facilitate record transfer to the new school, to adjust coding that will add your student to the correct school for the coming year and to verify that fee payment is recorded correctly.

Do I need to re-enroll my student right away? Yes. The district uses student registration to help us plan for the upcoming school year. The sooner you register, the better we can plan for the school year. If you wait to register and have questions or problems during the summer, you may experience a delay as school offices run on a very limited staff.

What is the link for Registration Gateway? [Click here.](#)

Is my child going to be impacted by a school freeze? If you are currently enrolled in the district and attending your zoned school you will not be impacted by the freeze. If you are currently enrolled in a school outside of your attendance area due to the freeze, if space becomes available in your zoned school you will be contacted by the District Office and offered the option to return to your zoned school.
